Re: New model release

Motorhome-World has recently completed it's development to have available, it's most popular unit, The Discoverer 4, on a Mercedes Sprinter 315CDI chassis. This model previously was only available on the Iveco 35S14 chassis.

Now our clients can choose out of two rear wheel drive chassis to power their favorite South African motorhome.

Although the Iveco is a suburb chassis for this motorhome model, the market has demanded for more choice. Motorhome-World has now delivered this choice. Slight changes on the sizes of the kitchen and bathroom have been made to accommodate this layout on a slightly shorter Sprinter chassis.

We expect this "star" to claim its place on our production model line-up. Work on development to have the Discoverer 6 also available on the Sprinter 315CDI is ongoing.

Please contact Motorhome-World for more information.

Model details:

Model : Discoverer 4

Chassis: Sprinter 315CDI

Power: 110Kw

Torque: 320Nm

Length(external): 6750mm
